You can thus restore all icons before opening a new package, use smart package loading or restart Windows Explorer on apply to correctly display all icons. During our testing, IconPackager worked like a charm and applied the new icon packages without any problem. Still, it's recommended to make a backup before anything else, just to make sure you're on the safe side all the time. Overview I collected my thoughts about this software and i share them with you at this time. It's a tool that can help us to customize our icons on the PC in an easy way. The tool has several built-in packages, they are: Windows 8 Windows 7 Windows Vista Windows XP You can view the content of every package from the tool after downloading, and you can also customize the icons. But more than that, you also can find some free packages on the Internet. I like this software, so i use it at least once a week, if not more. You can read more from the official website and read some reviews about the software. To install the software, you just need to download it from the official website, but you can use an additional method. All your icons at the same time. Simply put, IconPackager Cracked Accounts is an application designed to change all icons on your Windows workstations at once, which means you don't have to touch each single icon manually (or whenever you happen to open the program). There's no need to modify or install any drivers, no need to reboot and no downtime whatsoever. In other words, simply launch IconPackager and run its hot magic. The whole procedure takes no more than a few seconds and IconPackager will then replace all icons on your screen with new and fresh packs, usually saving your current set of icons for the next time you launch IconPackager. Icons can be changed in various ways, too. First, there's the possibility to choose between the included packages, which usually come with all the icons of a single topic you can imagine (such as FONTS, LIGHT/DARK, CTRL/ALT, SHARP/ROUND, etc.). There's also the possibility to download packages from the Internet, if you don't like the ones included. Packages can be submitted by other users, too. Once a package is downloaded and installed, IconPackager will let you preview its content, so you can make sure you're happy with the result before applying it to your whole computer. Finally, IconPackager lets you select and apply one or more icons to each folder, file or drive, and the app can also be used to replace default Windows icons, such as the cursor.
