Linkin Park Windows 7 Theme is a nice tool that puts together several images of the band and their logo. The app has a simple interface that should be quite easy to figure out. There are ten different pictures in the pack, representing the guys during various photo shoots or on stage, as well as their band logo. They all have a high resolution of 1920 x 1200 pixels, so they should fit well on the screen, regardless of the size of your monitor. If you don't want to include any of the images

in the rotation, it can be left out by simply clearing the checkbox next to the thumbnail. Also, by enabling the “Shuffle” option, you can randomize the order in which these appear. The picture position may be modified as well by choosing one of the five available options. However, thanks to their high resolution, the images shouldn’t suffer any quality loss regardless of your choice. A time delay can be set for the theme, varying from as little as ten seconds and growing gradually to

an entire day. The app comes with a special sound that can be heard each time the theme is selected, namely part of the track “Numb” from their 2003 “Metemora” album.

The bottom line is that Linkin Park Windows 7 Theme is a great tool that should make the band’s fans quite happy. Inexperienced individuals shouldn’t have any issues with installing and customizing this theme, thanks to the task’s simplicity.
